COMPANY OVERVIEW

TEAM X Technology LTD is a forward-thinking software development and technology solutions company dedicated to building secure, scalable, and innovative digital systems for businesses, financial institutions, and fintech organizations. We specialize in designing and deploying modern platforms that power digital banking operations, payment processing, agency banking services, mobile applications, and enterprise management systems.

With a strong foundation in financial technology, **TEAM X Technology LTD** delivers reliable solutions that simplify complex processes, automate operations, enhance customer experience, and support organizational growth. Our team consists of skilled engineers and solution architects with extensive experience in building mission-critical systems that meet high standards of performance, security, and compliance.

We combine industry knowledge with modern development practices to deliver products that are efficient, flexible, and future-ready. From requirements gathering to product deployment and long-term support, we provide end-to-end technology services tailored to the unique needs of each client.

At TEAM X Technology LTD, we are committed to excellence, innovation, and impact—helping institutions achieve digital transformation while maintaining trust, reliability, and operational efficiency.

Established Expertise

With years of proven experience delivering financial technology solutions, **TEAM X Technology LTD** has built a solid reputation for designing and deploying secure, scalable, and compliant digital banking systems. Our expertise covers the full banking technology spectrum—from core banking infrastructure and agency banking platforms to mobile banking apps, payment integrations, and enterprise management systems. We combine deep technical skill with practical industry knowledge, enabling us to help institutions modernize operations, improve customer experience, and achieve rapid digital transformation.

Mission-Driven

At TEAM X Technology LTD, we are mission-driven by a clear purpose: to empower businesses and financial institutions with innovative technology that improves lives and drives economic growth. Our mission guides every solution we build—ensuring our platforms deliver real value, enhance financial inclusion, and enable secure, seamless access to digital financial services for communities and customers.

Milestone Achievements

Over the years, **TEAM X Technology LTD** has recorded milestone achievements by successfully delivering scalable software solutions across banking, fintech, retail, and enterprise environments. Our track record includes building secure platforms for transaction processing, account management, agency banking operations, and mobile applications that enable seamless customer experiences. Each project delivered reflects our commitment to innovation, system reliability, and measurable business impact.

Innovation Culture

At TEAM X Technology LTD, innovation is not an event—it is a culture. We continuously explore modern technologies, best practices, and scalable architectures to build smarter solutions for financial institutions and businesses. Our teams adopt an agile approach to development, enabling rapid delivery, continuous improvement, and reliable performance. This culture helps us create systems that are future-ready, secure, and built to evolve with industry demands.

CORE BANKING & FINANCIAL SYSTEM DEVELOPMENT

At **TEAM X Technology LTD**, we build robust core banking and financial systems that serve as the foundation for secure and efficient banking operations. Our solutions are designed to support real-time transaction processing, customer account management, financial reporting, and system integrations—ensuring institutions can operate smoothly while scaling confidently.

We develop financial infrastructure that powers multiple channels including mobile banking, agency banking, POS networks, and API-driven fintech services.

Our Core Banking & Financial System Capabilities Include:

✓ Customer & Account Management

We develop systems that handle:

- Customer onboarding and profile management
- Account creation and maintenance
- Multi-account support (savings, current, wallets)
- Account restrictions, status control, and tier management

✓ Transaction Processing & Ledger Systems

Our platforms support:

- Deposits, withdrawals, transfers, and internal transactions
- Real-time balance updates
- Double-entry ledger and transaction traceability
- Transaction reversals, dispute resolution, and settlement flows

✓ Reporting, Reconciliation & Audit Trails

We provide enterprise-grade controls including:

- Automated reconciliation and settlement reports
- Financial performance dashboards
- Audit logging and compliance reporting
- Exportable reports for internal/external review

✓ Security & Compliance Readiness

Our systems are designed for regulated environments with:

- Role-Based Access Control (RBAC)
- Encrypted data handling
- Maker-checker approvals
- AML/KYC support and monitoring capability

DIGITAL BANKING & FINTECH PLATFORM DEVELOPMENT

Our Digital Banking & Fintech Development Capabilities Include:

✓ End-to-End Digital Banking Platforms

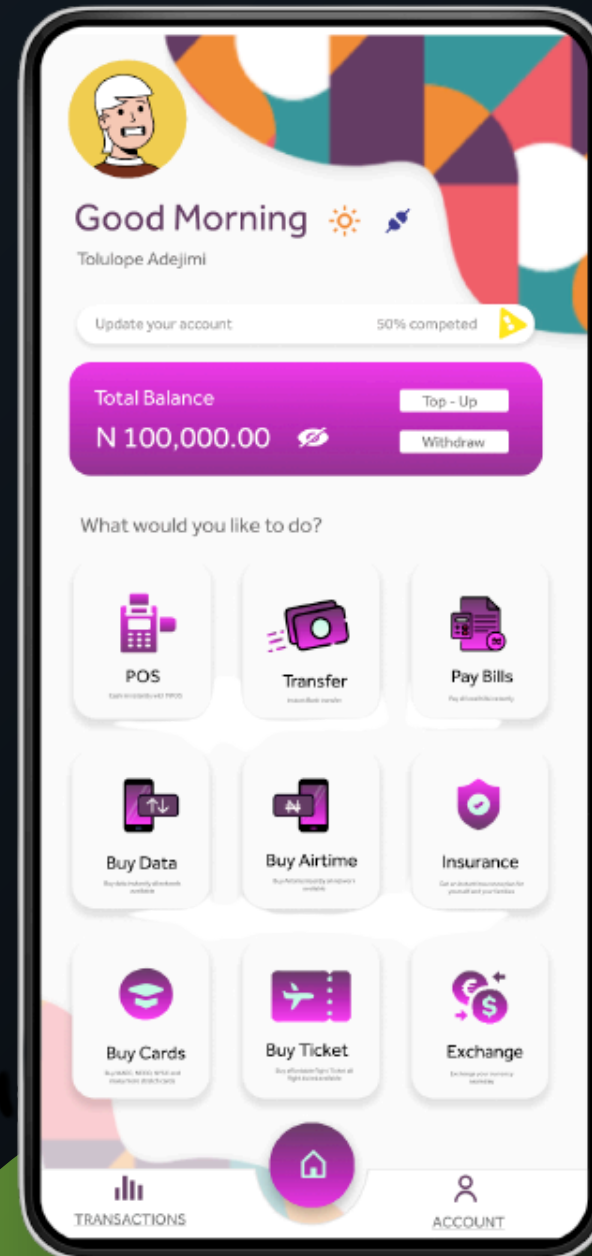

We build full-service banking platforms that support:

- Customer onboarding and account management
- Wallets and virtual accounts
- Local and international transfers
- Bill payments and collections
- Real-time notifications and reporting

✓ Fintech Product Development

We help fintechs bring innovative products to market, including:

- Payment and payout platforms
- Agency banking solutions
- Merchant and POS systems
- Savings, lending, and wallet services
- API-driven financial products

At **TEAM X Technology LTD**, we specialize in developing secure, scalable, and customer-friendly digital banking and fintech platforms that enable financial institutions and businesses to deliver modern financial services across multiple channels. Our solutions are designed to support real-time transactions, seamless onboarding, strong security, and reliable integrations—helping organizations accelerate digital transformation and remain competitive in today's financial landscape.

We build platforms that support both retail and business financial operations, ensuring smooth user experience, high system performance, and compliance readiness.

✓ Multi-Channel Access

Our platforms are designed for seamless access across:

- Mobile applications (Android & iOS)
- Web portals and dashboards
- Secure APIs for third-party integrations

✓ Customization & Growth Support

We deliver flexible systems that allow:

- Feature customization based on business needs
- Easy expansion into new services or markets
- Ongoing upgrades, support, and maintenance

AGENCY BANKING & AGENT MANAGEMENT SOLUTIONS

Our Agency Banking & Agent Management Capabilities Include:

✓ Agent Onboarding & Network Expansion

We provide tools for:

- Agent registration and verification workflows
- Agent tiering and eligibility rules
- Location mapping and territory control
- KYC-enabled onboarding processes

✓ Agent Wallet & Settlement Systems

Our platforms support:

- Agent wallets and float management
- Automated settlements and reconciliation
- Transaction reversals and dispute handling
- Monitoring of agent balances and liabilities

At **TEAM X Technology LTD**, we develop modern agency banking and agent management platforms that enable financial institutions to expand their reach, improve service accessibility, and drive financial inclusion. Our solutions allow banks and fintechs to build and manage agent networks that deliver secure banking services across urban and rural communities—efficiently and at scale.

We design agency banking infrastructure to support real-time operations, robust monitoring, settlement controls, and transparent commission management.

✓ Commission & Earnings Management

We implement configurable agent revenue systems including:

- Commission rules per product/service
- Instant or scheduled commission payouts
- Earnings summaries and performance reporting
- Transparent commission audit trails

✓ Agent Monitoring & Performance Analytics

Our solutions provide visibility through:

- Agent activity tracking and dashboards
- Fraud monitoring and suspicious activity alerts
- Agent ranking and productivity metrics
- Geo and device monitoring (where required)

TEAM X TECH

CORE DIGITAL SERVICES

At **TEAM X Technology LTD**, our core digital services are designed to help financial institutions, fintechs, and businesses launch, scale, and modernize their operations through reliable technology. We deliver end-to-end solutions that power digital transformation—covering secure system development, payment infrastructure, banking platforms, mobile applications, and enterprise automation.

Our services are built around performance, scalability, and security, ensuring clients can confidently serve customers, process transactions, and expand into new markets.

✓ Digital Banking & Fintech Platform Development

We build digital banking platforms that enable customer onboarding, account management, transfers, bill payments, wallet services, and real-time notifications—supporting a seamless user experience across channels.

✓ Core Banking & Financial System Development

We develop robust financial systems for transaction processing, ledger management, reporting, reconciliation, customer management, and role-based access controls.

✓ Agency Banking & Agent Management Solutions

We provide agency banking systems that support agent onboarding, transaction monitoring, cash-in/cash-out operations, commissions management, location monitoring, and settlement processes.

✓ Payment Solutions & API Integration

TEAM X integrates payment gateways, bank APIs, and third-party financial services to enable secure collections, payouts, transfers, verification services, and automated settlement workflows.

✓ POS & Merchant Payment Systems

We design and support POS software and merchant payment platforms, including transaction tracking, merchant onboarding, reporting dashboards, and payment routing.

✓ Enterprise Management Systems

We develop management platforms for organizations—including workflow automation, user management, inventory systems, CRM modules, financial reporting, and admin dashboards.

✓ 8. System Support, Maintenance & Upgrades

We provide continuous support, monitoring, troubleshooting, feature improvements, and security updates to ensure your systems remain stable, modern, and reliable.

✓ Mobile & Web Application Development

We build modern mobile applications (Android/iOS) and web platforms with secure authentication, clean UI/UX, and scalable backend systems.

TECHNOLOGY INFRASTRUCTURE

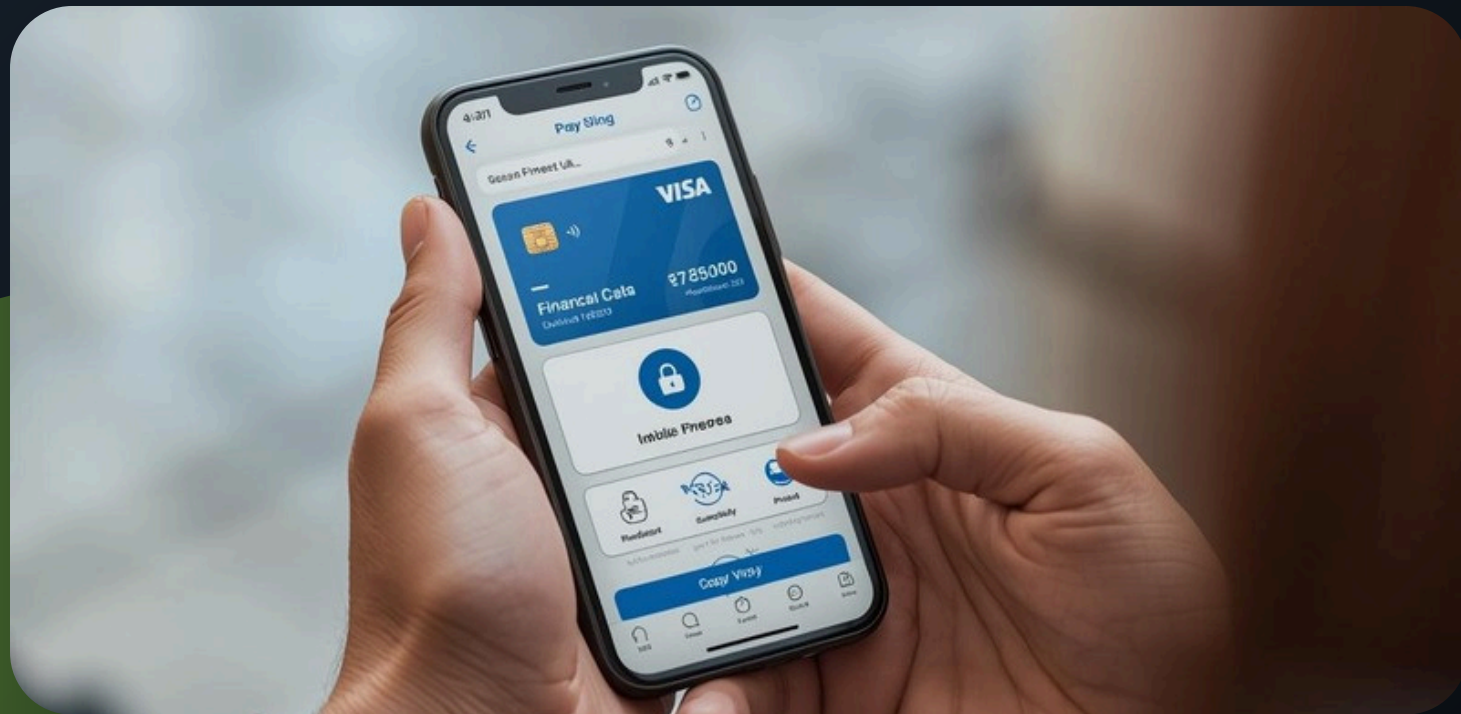

✓ Cybersecurity

At **TEAM X Technology LTD**, cybersecurity is a core foundation of every solution we build. We understand that digital banking and financial systems require the highest level of protection, reliability, and trust. That is why our platforms are designed with security-first architecture—protecting customer data, transactions, infrastructure, and integrations across all digital channels. We implement modern cybersecurity standards and secure development practices to reduce vulnerabilities, prevent unauthorized access, and ensure compliance with evolving industry regulations.

✓ AI Integration

At **TEAM X Technology LTD**, we integrate Artificial Intelligence (AI) to help financial institutions and businesses unlock smarter operations, faster decision-making, and improved customer experience. Our AI-driven solutions are designed to enhance automation, reduce operational cost, improve security, and deliver personalized services—while maintaining privacy, compliance, and system reliability. We combine AI capabilities with scalable software engineering to build intelligent systems that support modern digital banking and enterprise workflows.

At **TEAM X Technology LTD**, we build technology infrastructure that supports secure digital banking operations and high-performance enterprise platforms. Our infrastructure approach is designed for reliability, scalability, and availability—ensuring systems remain stable under heavy transaction loads while maintaining strong security standards. We deploy modern architectures that support seamless integrations, real-time processing, and smooth service delivery across mobile, web, API, and back-office channels.

✓ Secure APIs

At **TEAM X Technology LTD**, we design and implement secure, scalable, and well-documented APIs that power modern digital banking ecosystems. Our API infrastructure enables seamless integration between internal systems, mobile and web applications, payment gateways, third-party providers, and financial institutions—while maintaining strong security and compliance standards.

We understand that APIs are a critical entry point in digital finance, which is why we build with a security-first approach to protect customer data, prevent unauthorized access, and ensure transaction integrity.

✓ Cloud Systems

At **TEAM X Technology LTD**, we design and deploy cloud-based systems that enable modern digital banking operations and enterprise platforms to run with speed, scalability, and high availability. Our cloud solutions are engineered to support growing customer demand, real-time transactions, secure data handling, and reliable service delivery across multiple digital channels.

We help organizations transition from traditional infrastructure to modern cloud environments—ensuring performance, security, and cost efficiency.

TEAM X TECH

COMPLIANCE & SECURITY

✓ Audit Systems

At **TEAM X Technology LTD**, we build robust audit systems that ensure transparency, accountability, and compliance across digital banking and enterprise platforms. Our audit solutions are designed to provide complete visibility into system activities—helping institutions monitor operations, detect irregularities, track user actions, and meet regulatory requirements.

Audit systems play a critical role in strengthening internal controls, improving governance, and enabling faster investigation and reporting when required.

✓ Rules Compliance

At **TEAM X Technology LTD**, rules compliance is a core part of our system design and delivery process. We build digital banking and enterprise platforms that support regulated operations, enforce internal policies, and align with industry standards. Our solutions are structured to help institutions maintain operational discipline, reduce risk, and meet compliance expectations through automated controls and transparent reporting.

✓ Data Encryption

At **TEAM X Technology LTD**, data encryption is a fundamental security layer within every digital banking and enterprise platform we build. We understand that financial systems handle highly sensitive information—customer identities, transaction records, account details, and authentication credentials—therefore, protecting data confidentiality and integrity is critical. Our encryption approach ensures that sensitive data remains protected during transmission, storage, and system processing, reducing exposure to cyber threats and unauthorized access.

✓ User Protection

At **TEAM X Technology LTD**, user protection is central to how we design and deliver digital banking platforms. We understand that users must feel safe when accessing financial services—therefore, our systems are built to protect customers from unauthorized access, identity theft, fraud attempts, and data exposure.

Our user protection framework combines strong authentication, secure access controls, privacy safeguards, and real-time monitoring to ensure users enjoy a trusted and secure digital experience.

TEAM X TECH

CUSTOMER EXPERIENCE

At **TEAM X Technology LTD**, customer service is a core part of our value delivery not an afterthought. We provide reliable support, clear communication, and professional technical assistance to ensure our clients experience smooth operations before, during, and after deployment. Our commitment is to build long-term partnerships by offering responsive service and continuous improvement.

- ✓ Client-Centered Support
- ✓ Technical Support & Maintenance
- ✓ Onboarding & Training
- ✓ Reliable Communication

TEAM X TECH

OUR PARTNERS

At **TEAM X Technology LTD**, we believe strong partnerships are essential for delivering reliable digital banking solutions. We collaborate with trusted technology providers, financial service platforms, infrastructure vendors, and integration partners to ensure our clients benefit from secure systems, smooth connectivity, and scalable deployments.
